## **New Green SuperFood Drink Mix features Organic Chocolate**

### ***One Serving Helps Achieve the FDA's Recommended Daily Intake of Fruits & Vegetables***

(San Francisco, CA – October 9, 2007) – Amazing Grass has combined their premium blend of superfoods with the great taste and health benefits of organic cacao to create **Green SuperFood Chocolate Drink Powder**. This innovative new drink mix is an easy and delicious way for people to gain healthy servings of fruits and vegetables. Approximately 90% of the U.S. population does not obtain the recommended 5-9 servings per day. Just one serving of the new drink mix blended with milk helps consumers achieve the new FDA food pyramid guide's daily serving of fruits and vegetables. The **individual single-serving packets** are convenient for traveling, too.

Offered in a 30-serving scoopable canister for \$27.99, and a 15-count box of individual serving packets for \$21.99, Green SuperFood Chocolate Drink Powder contains more than **3,000 mg of organic green superfoods in each serving**. The Amazing Grass Green SuperFood blend is a unique and potent combination of nature's most nourishing, cleansing and rebuilding green superfoods including organic wheat grass, barley grass, alfalfa, spirulina, spinach, chlorella and broccoli. It is widely available around the country including Whole Foods markets and Wild Oats, and can also be purchased at [\*\*www.AmazingGrass.com\*\*](http://www.AmazingGrass.com).

### ***Organic Cacao – 'The Food of the Gods' is More than Just a Delicious Flavoring***

Although the chocolate taste is rich and delicious, Amazing Grass added organic cacao to Green SuperFood Chocolate Drink Powder for more than just flavor. Cacao is one of the richest food sources of antioxidants and heart-healthy magnesium and is a powerful source of essential minerals and nutrients including: Iron; Potassium; Vitamin C; proteins; beta-carotene; and alkaloids. A recent health feature about chocolate on *CNN.com*, "*Chocolate Can Do Good Things For Your Heart, Skin and Brain*," cited many of the recent studies that demonstrate its benefits for promoting heart health, improving blood pressure, enhancing brain performance, boosting physical energy and nourishing the skin.

In addition to the cacao and the Green SuperFood blend, this vegan and gluten-free drink mix offers an enhanced digestive enzyme and active probiotic blend to improve nutrient absorption. It also features Sambazon® Pure Acai Powder. This very nutritious purple berry grows in the Amazon Rainforest and is loaded with antioxidants, healthy omega fats, fiber and protein. Green SuperFood Chocolate Drink Powder also contains organic maca - a nutritious root grown at high altitudes in Peru that is an adaptogen that boosts the immune system and provides sustained energy, vitality and mental clarity.

Amazing Grass offers the most powerful vegetables on earth in a form that is convenient for hectic lifestyles. The small, family owned company provides premium nutrient-dense green superfoods for the whole family at grower direct prices. Amazing Grass produces certified organic wheat grass, barley grass, oat grass, rye grass and alfalfa from a family farm in Kansas. Unlike other green food products, their grasses are slow-grown for over 200 days and harvested once per year at the nutritional peak. They are then dehydrated at low temperatures and stored frozen to preserve freshness. In addition to Green SuperFood Chocolate Drink Powder, Amazing Grass offers organic Wheat Grass and GREEN SuperFood in drink powder and tablet forms, and Kidz SuperFood chocolate drink powder.
